

@ NIGHT SAFARI

Over 80% of tropical animals are nocturnal (active at night). Nocturnal animals have very keen senses to help them hunt, forage for food, detect enemies or locate potential mates in the dark.

ACTIVITY SHEET: CREATURES OF THE NIGHT SHOW

My Senses

Watch the Creatures of the Night Show and learn how nocturnal animals use their senses to help them survive in the dark.

The water is murky and I cannot see well! No worries, my sensitive whiskers and paws are great for detecting prey movement. I use my sense of _____ to hunt.

I am an **o** _____

To help me find food in the forest, I use my sense of _____. (Sniff, sniff.)

I am a **b** _____

My ears are located on different levels to pick up a wide range of sounds. I use my sense of _____ to listen out for prey.

I am an **o** _____
