

Data Collection @ Primate Kingdom

PART A

ACTIVITY: Fill In the Blanks

You have decided to work with the Zoo to collect data on the different primates found in Primate Kingdom. The table below is supposed to show some important information about the different primates. However, the table is incomplete. You need to complete the blanks and answer the following questions. The first one has been done for you.

No	Name of Primate	Gestation Period (mths)	Life Span (Max years)	Diet
1	De Brazza's Monkey	About 9 months	30 years	Fruits, leaves, roots & insects
2	Spider Monkey			
3	Lion-tailed Macaque			
4	Black & White Colobus Monkey			
5	Brown Capuchin			
6	Celebes Crested Macaque			
7	Patas Monkey			
8	Douc Langur			

1. Express in ratio the gestation period of the Spider Monkey to that of the Douc Langur.

2. Which primate has the longest life span?

3. What is the average life span of the 7 primates? (Answer correct to nearest whole number)

4. What percentage of the primates shown in the table are herbivores? (Answer correct to 1 decimal place)

5. What percentage of them are omnivores? (Answer correct to 1 decimal place)

6. Do your answers to (4) and (5) add up to 100%? If yes, what does this mean?
